

Filtek™

Supreme XTE Universal Restorative

Dentists everywhere love using it anywhere

Dentists around the world have made 3M™ Filtek™ Supreme XTE Universal Restorative their composite of choice for more than 600 million restorations worldwide ... and counting. As you'd expect from the global leader in aesthetic and restorative technologies, 3M's TRUE nanotechnology brings aesthetics and strength to every restoration – anterior or posterior – so your restorations will last and look beautiful, too.

Next level aesthetics

- Brilliant polish retention
- Wide range of shades and opacities
- Natural-looking fluorescence

Simple to use

- Exceptional handling
- Natural-looking body shades for a simple, single-shade technique
- Capsules and syringes are colour coded by opacity

Durable in anterior and posterior use

- Excellent wear resistance
- Outstanding strength
- High radiopacity

Any place: anterior or posterior. Any class.

Any aesthetic solution

When you want to elevate your artistry, here's your dream palette.

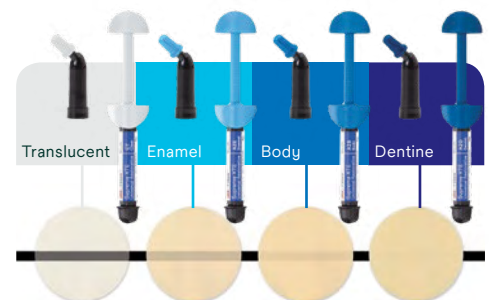

Our 36 beautiful shades and 4 opacities allow you to match any patient's dentition and create restorations that are virtually undetectable using a multi-shade layering technique.

When you want a simple solution, you'll love this.

Most restorations are made with just one of eight Body shades. Dentists say they love the way Filtek™ shades blend with surrounding dentition. You'll find it easy to satisfy patient expectations using a simple single-shade technique.

Shade match

Body shades match the VITA® Classical Shade Guide.

Syringes and capsules are colour coded by opacity – Translucent, Enamel, Body and Dentine.

More reasons to love using 3M™ Filtek™ Supreme XTE Universal Restorative anywhere

Exceptional handling

It's easier to achieve the restorative result you want when the composite handles well. In a field study, dentists rated 3M™ Filtek™ Supreme XTE Universal Restorative as “ideal” on viscosity, stickiness, flow and ability to hold its shape.

Simple next level aesthetics

It's easy to move from a single-shade to a dual or multi-shade technique. Syringes and capsules are colour-coded by opacity and have bold lettering for fast, accurate selection. Ask for your FREE Shade Selector Wheel tool which allows you to easily select the shades to use for your preferred technique. Visit our website for additional resources.

Excellent performance

2018's 15 Year Clinical Evaluation*: The performance of over 2,300 monitored restorations has been exceptional, regardless of their size. Excellent aesthetics, low rate of fracture/chipping, minimal marginal discolouration, and minimal wear have been instrumental to the long-term success rate of these restorations. 3M Filtek Supreme XTE earned a clinical performance rating of 96%!
