

**“I wish my  
appointment  
lasted longer.”**

*– said no one ever*

Custom digital bracket placement is designed to make your bonding appointment shorter, letting you get on with your day.

You'll spend less time getting your braces on and more time perfecting your smile!

just got easier!**

CLARITY™ DIGITAL BONDING

# Here's what you can look forward to with Clarity™ Digital Bonding:

Say goodbye to messy impressions — we scan your teeth digitally in seconds!

Picture your perfect smile — right away! Your orthodontist digitally designs your finished smile using 3D software. You'll be able to see your finished smile before you even start.

Custom trays are used to place the braces on your teeth all at once. No more long, uncomfortable bonding appointments!

Shorter treatment times — up to six months, which means fewer office visits and less time waiting for your new smile!
