

3M Health Care is now Solventum

Real-world success shared by your peers

Practice success using Clarity™ Precision
Grip Attachments with Clarity™ Aligners

What should you know about Clarity™ Precision Grip Attachments?

Watch the
Step-by-Step
Bonding Protocol

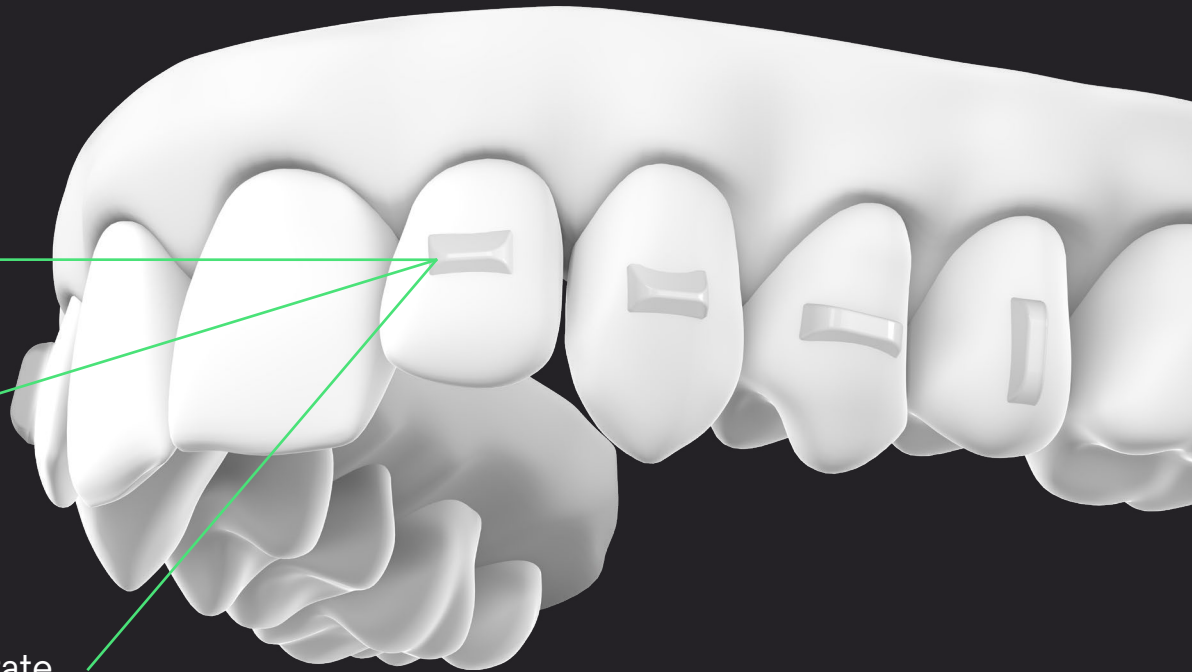

They are 3D-printed, pre-cured attachments delivered in a bonding tray

The procedure results in no composite flash to clean up

The attachments are accurate, stain resistant and engage predictably with aligners

Practice impact of adopting Clarity™ Precision Grip Attachments

Case study: Dr. Thomas Crary

“For my team, the highlight of working with Clarity™ Precision Grip Attachments is the delivery appointment. They no longer like using conventional attachments. We appreciate that we don’t have to remove flash, and we have fewer failures. I also notice they resist staining and maintain their shape better.”

TREATMENT OUTCOMES

In my experience, Clarity™ Precision Grip Attachments:

- ✓ Engage better with aligners and reduce unwanted tooth movement
- ✓ Support better rotational, tipping and torque attainment

In my office, cases with Clarity™ Precision Grip Attachments:

- ✓ Track more predictably, better attain the Tx Design and refine less
- ✓ Treat out in less time

Practice impact of adopting Clarity™ Precision Grip Attachments

Case study: Dr. Grant G Coleman

“The bonding process is much faster and more streamlined for staff, and I basically do no cleanup at all. They hold up better and resist wear better than conventional attachments. Cleanup is easier with less dust as well!”

TREATMENT OUTCOMES

In my experience, Clarity™ Precision Grip Attachments:

- ✓ Engage better with aligners 
- ✓ Reduce unwanted tooth movement 
- ✓ Tracks more predictably
- ✓ Tracks more efficiently with shorter refinements
- ✓ Offer better in/out, rotational, tipping and torque attainment

Practice impact of adopting Clarity™ Precision Grip Attachments

Case study: Dr. Marie-Elena Cronin

“We find that cases with Clarity™ Precision Grip Attachments are more precise, result in less flash and track better. The attachment placement time is also reduced.”

TREATMENT OUTCOMES

I find that Clarity™ Precision Grip Attachment cases treat out two months faster than cases with conventional attachments.

In my experience, Clarity™ Precision Grip Attachments:

- ✓ Reduce unwanted tooth movement and track more predictably 
- ✓ Better attain the treatment design, requiring fewer refinements
- ✓ Treat more efficiently with shorter refinements and shorter overall
- ✓ Require fewer attachments overall treatment time

STRONGLY BELIEVES

Clarity™ Precision Grip Attachments engage better with aligners

Clarity™ Precision Grip Attachments maintain shape better and resist wear

Clarity™ Precision Grip Attachments are easier to remove post-treatment

Dr. Christian Groth
Adjunct Clinical
Professor

Practice impact of adopting Clarity™ Precision Grip Attachments

Case study: Dr. Christian Groth

“Clarity™ Precision Grip Attachments are so much easier on my team, my patients, and me. Training new team members is simple, and doctor intensive time at the bonding appointment is effectively eliminated.”

TREATMENT OUTCOMES

Clarity™ Precision Grip Attachments improve aligner treatment in my practice:

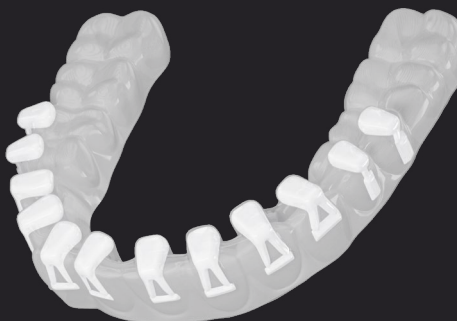

- ✓ Engage much better with the aligners, reducing unwanted movement 
- ✓ Track more predictably, reducing refinements and resulting in shorter treatments
- ✓ Reduce refinements and result in shorter refinements 
- ✓ Require fewer attachments

Mongillo
Orthodontics

Practice impact of adopting Clarity™ Precision Grip Attachments

Case study: Dr. Anthony Mongillo

“It took our team awhile to get the hang of Clarity™ Precision Grip Attachments, but the learning curve was well worth it. Now, my staff saves time at the bonding appointment, and because I no longer have to remove flash, I do, too. The aligners fit better, and the treatment efficiency is improved.”

TREATMENT OUTCOMES

Clarity™ Precision Grip Attachments improve aligner treatment in my practice:

- ✓ Shorter treatment times
- ✓ Track better and better attain Tx Design
- ✓ Reduce unwanted tooth movement
- ✓ Engage better with aligners
