

Solvantum™ Fluency Direct™ Intelligence designed for pathologists

AI-powered speech recognition built for high-demand pathology environments

- Enable faster pathology documentation and report creation
- Reduce reliance on manual or outsourced processes
- Improve pathologists' experience and satisfaction by decreasing administrative burden

Pathology's documentation challenge

Pathology departments operate under the constant pressure of high patient volumes while managing:

- Complex documentation
- Highly specialized terminology and detailed diagnostic reporting
- Tight turnaround time expectations
- Manual documentation processes that introduce inefficiencies and errors
- Reliance on external transcription services that delay case completion

Dictation designed for how pathologists work

Solvantum Fluency Direct delivers advanced speech recognition that enables reliable, real-time documentation within existing clinical workflows.

Feature	Benefit
Pathology-specific intelligence	Optimized for complex terminology and reporting structures unique to pathology, improving recognition accuracy and documentation quality
Hands-free documentation	Dictate directly into laboratory information systems (LIS) and electronic health records (EHRs), reducing manual data entry and freeing up time for higher-value work
Custom commands and templates	Personalized voice commands and report templates help standardize documentation, automate repetitive tasks and support consistent, high-quality reporting
Seamless system integration	Integrates with existing EHR and LIS environments, enabling voice documentation without disrupting workflows
Dictate anywhere, on any device	A single cloud-hosted voice profile delivers consistent performance across workstations, locations and devices

Advancing clinical and operational performance

By simplifying documentation and reducing manual effort, Solventum Fluency Direct helps drive meaningful improvements in both clinical accuracy and operational efficiency.

Increase productivity

Faster documentation supports higher case throughput and quicker turnaround times.

Improve accuracy

AI-driven speech recognition supports precise clinical language and reduces transcription errors.

Reduce costs and delays

Real-time dictation minimizes reliance on outsourced transcription services.

Improve clinician satisfaction

Voice-enabled workflows reduce documentation burden and frustration.

Supporting better outcomes in pathology

Solventum Fluency Direct helps streamline documentation, improve accuracy and reduce administrative effort — enabling pathology teams to work more efficiently while maintaining a focus on high-quality patient care.
