

Solventum™ Performance Insights

Analytics reimagined

- Analytics-focused application with simplified dashboards and data refreshed daily for an improved user experience
- National and peer benchmarks from one of the largest U.S. healthcare datasets to help measure healthcare performance
- Visit-level drill down directly into Solventum™ 360 Encompass™ System to explore key opportunities and act with confidence

The challenge: Data without direction

Healthcare leaders must move quickly, but fragmented data, competing priorities and limited benchmarks make it hard to focus with confidence.

Financial pressure

Rising costs, denials and thin margins demand greater efficiency, yet many organizations struggle to identify where to act for the greatest financial impact.

Unclear direction

Data is abundant but can be hard to interpret. Teams spend time digging through reports instead of uncovering actionable insights to improve performance.

Lack of comparison

Without meaningful peer benchmarks, it's difficult to set goals, measure progress or understand how performance truly stacks up.

The solution: Actionable analytics

Solventum Performance Insights (PI) brings analytics into one content-focused application for your teams to understand performance, prioritize focus and act with confidence. Dashboards organize content by role and leverage AI-assisted analysis with data refreshed daily. Industry-trusted expertise provides insight, highlighting where action can lead to the greatest impact. This helps teams make faster, more confident decisions with less effort.

The Solventum advantage

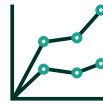

At Solventum, we speak the language of health with purpose and insight as a trusted partner to more than 3,000 healthcare organizations across the U.S. and in the 30+ countries that use our solutions. Our expertise sets the industry standard in risk-adjustment, population and quality methodologies. This expertise is embedded into Solventum Performance Insights, delivering data analysis with prioritized opportunities for accurate reimbursement and quality reporting.

Going beyond traditional analytics. Solventum Performance Insights delivers.

One unified analytics experience, built for clarity and consistency

Solventum Performance Insights brings analytics into a single, content-centric application, so your teams have one place to understand performance and a consistent experience across dashboards and users. This includes access to all Data Discovery Dashboards previously available in Solventum™ 360 Encompass™ Analytics along with new Insights Dashboards.

Analytics designed to support measurable outcomes and ROI

Built to help organizations clearly demonstrate value, supporting better decisions, improved quality, accurate reimbursement and measurable performance.

Ongoing partnership, not a one-time report

Solventum's quarterly "Analytics Power Hour" webinars keep users informed about new dashboards, benchmarks, regulatory changes and features. Experts educate users on updates and trend identification and work with customers to interpret data, monitor progress and pinpoint opportunities for improvement.

Insights that go beyond reporting to drive action

Prioritized insights allow organizations to drill down from high-level trends to visit-level detail, and back into Solventum 360 Encompass, moving quickly from insight to action.

Benchmarks that put performance in context

Solventum™ Performance Insights Benchmarks enable healthcare organizations to measure key metrics and set goals based on data from more than 3,000 facilities, monitor performance against peers and identify gaps and opportunities for improvement. Solventum Performance Insights has a comprehensive set of benchmarks in clinical documentation integrity (CDI) and utilization benchmarks with new benchmarks in quality and operational measures, like Elixhauser, enabling risk-adjusted comparisons and improvements.

Simplified analytics. Smarter decisions. Stronger outcomes. *Analytics reimaged.*
